

## **Diginex Signs Strategic Agreements with iNEED to Advance Sustainability Reporting for Rural Banks in Indonesia**

September 30, 2025

LONDON and JAKARTA, Sept. 30, 2025 (GLOBE NEWSWIRE) -- Diginex Limited (NASDAQ: DGNX) ("Diginex"), a leading provider of Sustainability RegTech, today announced it has signed strategic agreements with PT. Inovasi Emran Ekadanta ("iNEED"), a prominent Indonesian technology innovator focused on sustainable digital transformation, to deliver comprehensive sustainability reporting capabilities to over 1,000 rural banks throughout Indonesia. This alliance builds on iNEED's established collaborations with associations in Indonesia such as DPP Perbarindo, the Dewan Pimpinan Pusat (DPP) of Perhimpunan Bank Perekonomian Rakyat Indonesia (Perbarindo). Pursuant to the strategic agreement, iNEED has agreed to pay Diginex upfront fees of approximately US\$1.7 million, plus a follow-on revenue share structure.

The initiative will leverage Diginex's award-winning diginexESG platform—a cloud-based solution that streamlines ESG data collection, analysis, and disclosure—to empower Indonesian financial institutions with tools for regulatory compliance, risk management, and transparent stakeholder reporting. By integrating diginexESG, the Indonesian rural banks will gain access to automated workflows, AI-driven insights, and standardized frameworks aligned with global standards such as the International Sustainability Standards Board (ISSB) and local Indonesian regulations.

This alliance comes at a pivotal moment for ESG adoption in Southeast Asia, where investor interest in sustainable opportunities has surged, with 70-82% of regional investors actively exploring ESG-focused investments. Corporate Boards across ASEAN are increasingly prioritizing sustainability, with 45% planning to establish dedicated ESG or sustainability committees in 2025. Key developments in the increasing ASEAN adoption of ESG, include the launch of carbon exchanges and expansions in renewable energy capacities, signaling a broader shift toward decarbonization and economic competitiveness through green initiatives. In Indonesia, the strategic relationship between Diginex and iNEED will address the growing demand for robust ESG reporting amid regulatory pushes for transparency in the banking sector by enabling the association of rural banking in Indonesia to deliver against its sustainability goals.

"The signing of these agreements with iNEED marks a significant step in scaling sustainable finance across Indonesia's dynamic banking landscape," said Mark Blick, CEO of Diginex. "By partnering with an innovative local player like iNEED, who brings deep ties to rural banks in Indonesia, we are preparing to offer the rural banking association of Indonesia with the tools to not only meet compliance needs but also drive long-term value creation. We are grateful to Resulticks for introducing this relationship, which aligns perfectly with our mission to make ESG accessible and actionable."

Added Raden Joko, iNEED CEO, "Our partnership with the rural banking association of Indonesia has already positioned us as a key enabler of digital innovation in Indonesian banking. Teaming up with Diginex elevates this effort, providing our network with cutting-edge ESG technology that will support the sustainability goals of the association. Resulticks' facilitation was instrumental in bringing these worlds together."

This collaboration between Diginex and iNEED was the result of an introduction through Resulticks, a global real time customer engagement and experience solution provider, highlighting the power of strategic introductions in fostering cross-border sustainability partnerships. On June 5, 2025, Diginex announced the signing of a Memorandum of Understanding ("MOU") for a cash and share acquisition of Resulticks.

### **About Diginex**

Diginex Limited (Nasdaq: DGNX; ISIN KYG286871044), headquartered in London, is a sustainable RegTech business that empowers businesses and governments to streamline ESG, climate, and supply chain data collection and reporting. The Company utilizes blockchain, AI, machine learning and data analysis technology to lead change and increase transparency in corporate regulatory reporting and sustainable finance. Diginex's products and services solutions enable companies to collect, evaluate and share sustainability data through easy-to-use software.

The award-winning diginexESG platform supports 19 global frameworks, including GRI (the "Global Reporting Initiative"), SASB (the "Sustainability Accounting Standards Board"), and TCFD (the "Task Force on Climate-related Financial Disclosures"). Clients benefit from end-to-end support, ranging from materiality assessments and data management to stakeholder engagement, report generation and an ESG Ratings Support Service.
